

The Petition

To stop EPA's pending action, we request that you express your desire to hold on to the right to work on your own vehicle's A/C system. Stay Cool USA will not sell or otherwise share your personal information with any third parties and you will not be contacted unless you contact us.

Yes, I support Stay Cool USA's position and want the U.S. House, Senate and EPA to preserve the right of American consumers to work on, maintain and service their own Automotive Air Conditioning systems. I give limited permission to use my name only as part of a broader national or state petition and only for lobbying purposes.
